

2020 MOBILE DI-CUT CATALOG

OUR 2D-Cutouts are applied to any equipment (CT, MRI, PET, Nuclear Medicine, Mobile Units, etc.) to create a unique and thoughtfully inspired design to enhance the patient experience on any modality.

Our Di-cut solution does not fully cover the complete surface, but rather, covers over 85% of the area, while still being easy to install and maintain.

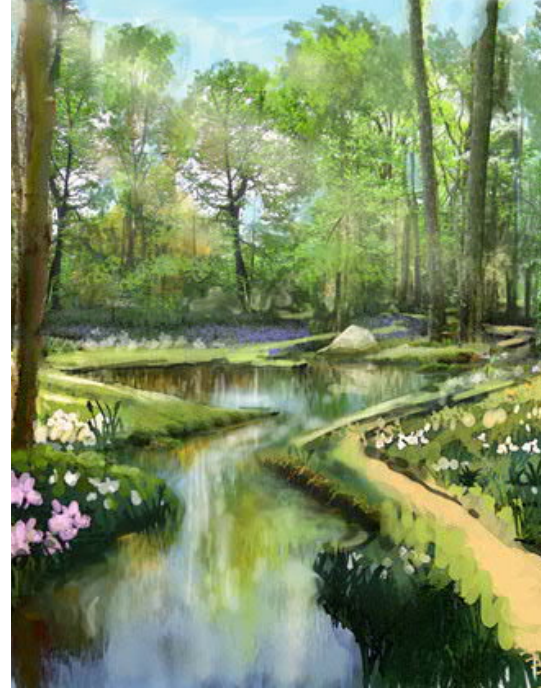

Durable, washable and scrubbable, facilities can use normal medical cleaning products, except for straight bleach. Diamond Shield may be used and is a secondary clear covering applied to specific areas that may be susceptible to more wear and tear.
